1. FEATURES

- 7" touchscreen LCD (1024 x 600)
- · Works with Apple CarPlay (wired)
- · Supports Android Auto (wired)
- Built-in Bluetooth (A2DP, AVRCP, HFP, PBAP)
- AM / FM Tuner with RDS & presets (18FM/12AM)
- Reverse camera input (AHD 720P compatible)
- · Rear A/V input
- 4V / 5CH RCA Preout
- MP3 / AAC / FLAC / MPEG 1,2,4 Media formats
- Subwoofer level control
- Time alignment capabilities

- USB: CP/AA/USB Media
- 8 Band graphic EQ
- 8 EQ Presets
- 50W x 4 Max built-in ampli er
- · Shallow 2-DIN chassis mounting design
- · Steering wheel control ready
- External microphone included

2. INTERFACE ICONS

3. MAIN MENU

- 1 Home screen/back button
- ② Date/Time
- 3 Current Source Music Info
- 4 Toggle Display Brightness
- (5) Radio Mode (Page 4)
- 6 Bluetooth Mode (Page 6)
- (7) CarPlay Icon*
- (8) Android Auto Icon*
- (9) AV In
- 10 USB Mode (Page 5)
- (11) Settings

* Icons will only be visible if a compatible mobile device is connected. For more information refer to page 12-13.

NOTE: The headunit screen will automatically return to its previous source after a period of time, when in the main menu or settings.

4. RADIO MODE

To enter Radio Mode, touch "Radio" icon on the Main Menu

- Seek down
- ② Radio frequency
- ③ Manual frequency adjustment
- 4 Seek up
- ⑤ AM/FM Band button
- ⑥ EQ Mode button
- (7) Keypad button
- 8 Auto Store button
- Setup button
- 10 Preset station list

Auto Tuning

Press the seek icon (I∢ or ►)) on the Monitor screen to increase / decrease the tuning frequency one step at 0.05MHz increments for FM and 9KHz increments for AM. Press and hold the seek icon (I∢ or ►)) on the Monitor screen to seek the available channel by increasing or decreasing the tuning frequency.

FM and AM

Touch the "FM1" or "AM1" on the screen to change among the following bands: FM1, FM2, FM3 or AM1 and AM2.

Preset Stations

Six(6) stored stations for the current band appear on the screen, touch the preset directly for use or press the number buttons located on the head unit.

Storing and recalling a Station

- 1. Select a station. (Example: FM1 103.6MHz)
- 2. Touch and Hold the desired preset number for 3 seconds to store the Radio station.
- 3. To recall a station select a Band (If needed).
- 4. Touch the preset button on which the corresponding radio station is stored or press the number button on the Radio panel.

Setup Button

- AF (Alternating Frequency), enables the radio to automatically switch to an alternate frequency broadcasting the same station when the initial signal weakens
- REG (Regional), is used to identify the regional information of a radio station
- TA (Traffic Alert mode), is a feature that interrupts regular broadcast to provide traffic
 updates and alerts.

5. MEDIA PLAYING MODE

This operation allows you to play various compatible formats.

- 1) Touch the | icon to return to previous track or press and hold the icon to fast rewind
- ② Touch the ▶/II icon to play or pause the track
- ③ Touch the ▶ icon to go to next track or press and hold the icon to fast forward
- 4 Touch the end of the progress bar line and drag it left or right to the desired track time
- (5) Touch the icon to repeat a folder or track
- (6) Touch the icon to activate / deactivate the track in random mode
- (7) Touch the icon to show the track list
- (8) Touch the icon to display the equalizer settings
- Playing track ID3 info (needs media file support)
- 10 Touch to go back to previous folder
- (11) Touch for music list
- 12 Touch for video list
- 13 Touch for keypad for quick search
- (14) File List

6. BLUETOOTH MODE

NOTE: Bluetooth mode can only be accessed when not connected to Android Auto or Apple Carplay.

- When the phone connects to the unit successfully, all of the phone's Bluetooth enabled options will be active.
- This unit can be paired with 5 mobile phones, but only one can be active at a time.
- The unit Bluetooth name is XVCPA700.

- 1) Touch the icon to enter pairing mode
- (2) Touch the icon to keypad
- 3 Touch to open the phone book
- (4) Touch to open the phone interface
- (5) Touch the icon to enter Bluetooth music
- 6 Touch the icon to enter Bluetooth settings
- Outgoing call list
- (8) Incomming call list
- Declined call list
- Auto connect to your previously paired bluetooth device
- 1 Auto answer for incoming calls
- 12 Sync Call logs and Contacts

- > Some mobile phones may not support the download function.
- > Depending on the music player you are using, streaming may not be supported.

Setup menu allows you to change the settings within unit, General, Display, Audio and Others

• Touch "Others" on the Setup Menu display, then select for information and factory reset.

| Setting | Options | Functions | |
|-------------------------|----------|--|--|
| Factory Default | No / Yes | Touch to return to the factory setting | |
| Version | - | Software version of the radio | |
| Steering Wheel Controls | - | Touch to manually adjust SWC functions | |
| License | - | Displays license information | |

Steering wheel controls

Connect to the vehicles steering wheel control harness using the steering wheel control cable. Contact your US Audio dealer for details.

The Steering Wheel Control screen will allow you manually assign your steering wheel controls to control your headunit.

This will only be required if your steering wheel controls are not working correctly.

- 1. Press Reset to begin the manually setting your Steering Wheel Controls.
- 2. When the icon is flashing, press the corresponding Steering Wheel Button, matching the icon on the head unit to the steering wheel control. You will know a button is pressed by a string of numbers/letters appearing underneath the button.
- 3. It will automatically move onto the next icon and wait for the next steering wheel button to be pressed.
- 4. Repeat this process until you have programmed all your steering wheel controls.
- 5. If you don't have a corresponding button on your steering wheel, then simply tap the next icon you want to program on the head unit.

NOTE: Not all buttons can be manually set in some vehicles.

12. WIRED CARPLAY OPERATION

NOTE: The park brake needs to be connected for Apple CarPlay to function.

Wired connection

- 1. Turn on Bluetooth on your compatible device
- 2. Connect an Apple CarPlay compatible device to this unit via USB1 (CP/AA/USB Media)
- 3. A pair message and a pairing request code may appear on your compatible device and head unit. Click allow to accept
- 4. An 'Allow CarPlay with XVCPA700 while phone is locked' message may appear on your device. Click allow to accept
- 5. The Apple CarPlay automatically displays on screen.

13. WIRED ANDROID AUTO™ OPERATION

NOTE: The park brake needs to be connected for Android Auto to function.

Wired connection

- 1. Connect an Android Auto™ compatible device to this unit via USB1 (CP/AA/USB Media)
- 2. Follow on-screen instructions that may appear on your device and head unit
- 3. Press the Android Auto icon to initiate a connection. The Android Auto home screen appears

Requirements

- · Lightning Data Cable
- iPhone 5 or later
- iPhone with iOS 7.1 or later
- · Data Plan for in app content
- · Siri activated

Phone Setup (Before you begin):

- 1. Apple CarPlay ® features may operate differently than on your Apple iPhone ®
- 2. Message and data charges may apply when using Apple CarPlay. Please check with your carrier
- 3. Apple CarPlay ® relies on the performance of your phone. If you experience performance issues:

Close all apps and then restart them again

- Disconnect and then reconnect your phone using the Apple Lightning cable that was provided with your phone is recommended.
- 4. When Apple CarPlay @ is active, your voice recognition system is disabled and you will be using Siri @ to make your requests
- 5. On your phone, go to Settings > General > Siri and ensure Siri is turned ON

NOTE: For details about Apple CarPlay, refer to the manual supplied with your iPhone, or visit the website of Apple CarPlay.

15. USING SIRI®

NOTE:

Ensure Siri feature is set to ON in your phone (**Go to Settings> General > Siri).**

Apple CarPlay uses Siri to perform many actions like sending messages, placing calls, and looking up/setting POI/Destinations.

A Siri session can be initiated on any screen by:

- Touching and holding the Home icon on the CarPlay screen or
- Pressing the Voice button on the panel or the Steering Wheel, then say any of the following commands:
- "Text <Name> Call you later" to send a text message.
- "Read text messages" to read available text message.
- "Call <Name>" to make a phone call.
- "Find <POI/Destination>" to locate a POI/Destination.

16. USING GOOGLE VOICE®

Android Auto uses Google voice actions for many functions. A Google voice action session can be initiated on any screen by:

- Touching the **Microphone** icon on any screen.
- Pressing the **Voice Recognition** Button on panel or Steering Wheel.

Making a Call

Touch the Phone icon to access recent call list. Or you can initiate a voice action and then say "Call <Name>" or "Dial <number>" to make phone calls from any screen.

17. HOW TO USE ANDROID AUTO ®

Requirements

- A high-quality USB cable
- Compatible Android® phone with OS Android 8.0 or higher
- Data Plan for in app content
- Android Auto App download from the Google Play® store if not on your device
- Android Auto must be available in your country or region

Phone Setup (Before you begin):

- 1. Android Auto ® features may operate differently than on your Android ® phone.
- 2. Message and data charges may apply when using Android Auto. Please check with your carrier
- 3. Android Auto relies on the performance of your phone. If you experience performance issues:

Close all apps and then restart them again

Disconnect and then reconnect your phone using the USB cable that was provided with your phone is recommended

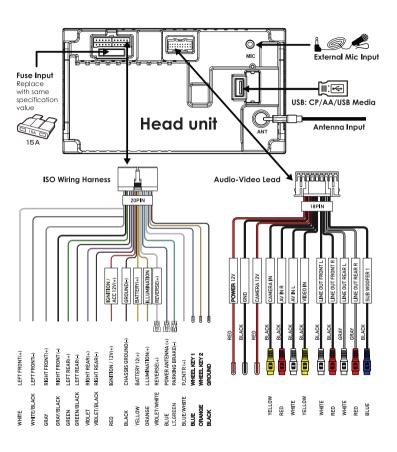

When Android Auto is active, your in-vehicle voice recognition system is disabled and you will be using Google® voice actions to make your requests

Overview

 Android Auto organizes recent actions and information into simple icons on the Android Auto Home screen.
 Touching an actionable icon will take you to the app.

NOTE: For details about Android Auto, refer to the manual supplied with your Android phone, or visit the website of Android Auto.

NOTE: This diagram shows a basic wiring configuration.

For your safety be sure to connect the park brake wire.

Some vehicles will not have a park brake output from the vehicle.

| | 4.1CH Audio Out Cable | Yes |
| | External Microphone | Included |

20. FAQ/TROUBLESHOOTING

My Mobile phone will not connect to the head unit

- If you are having trouble connecting your phone to the head unit, try restarting your phone and try again.
- It is also recommended to do a factory reset on the head unit as this will solve most of the connection issues between your phone and your head unit.
- If you are having issues with connecting Android Auto or Apple CarPlay over a USB connection, try using another high quality/shorter length cable. Using low quality cables and longer lengths may cause issues such as drop outs and or connection issues.
- Make sure your phone is up to date with the latest software updates.

Red Blinking Power Light on the Head Unit

 This can mean the head unit doesn't have enough power to power on the unit or there is a wiring issue.

Android Auto/Apple CarPlay won't work unless Park Brake is active but the kit didn't have a Park Brake connection.

 You may have to manually make a connection between your hand brake and the harness on the headunit for these functions to work,

Issue with microphone on handsfree calls

- Try increase or decreasing the gain in the settings menu (see p.8)
- Ensure that the microphone is connected to the back of the headunit,
- Make sure to use the external microphone provided with this product as other external microphones may be incompatible.

21. SAFETY INFORMATION & WARNINGS

Do not try opening the shell or try to repair the product by yourself.

If the product or it's accessories have any problems and is still under warranty, then take it back to the place of purchase with the original purchase receipt.

Do not use a chemical substance, cleaning solvent or cleaner to clean the product, please use a moist soft cloth if you would like to clean the product.

Do not use the product under conditions where dust is present.

Please pay attention to cleaning the display surface, use a moist soft cloth to clean the display.
